Subject Index — Volume 73

Academic innovation, towards a 'scientific-economic' framework in Taiwan, 73:199
Almost real time Delphi, an efficient real time method, 73:321
Australian cropping regions, adoption of conversation tillage, an application of duration analysis, 73:630
Automobile transport, an integrated sustainable scenario analysis in the 21st century, 73:607
Auto recycling, assessing the economics of related activities under the new EU Directive on end of life vehicles, 73:277
A visible end to innovation, technical discussion, 73:903

Bibliometrics, and patent analysis for forecasting emerging technologies, 73:981
Biotechnology, analysis of a debate on the future and risks of Finnish forest biotechnology, 73:705

China, use of an input-output model to assess how social and economic changes affect energy requirements and energy intensity, 73:405
Chinese firms, technology transfer and innovation performance, 73:666
Constructive technology assessment, rethinking as a democratic, reflective and discursive process, 73:13
Cross-impact, a system-theoretical analysis approach, 73:334
experts's knowledge, a comparison of two methods, Delphi and cross-impact analyses, 73:679
Customer's expectation and satisfaction, a dynamic diffusion model, 73:648

Data mining, improvement of university library services, 73:1045
Data mining, measures for knowledge-based economic development for economic developers in the state of Georgia and the US South, 73:950
Delphi, an efficient, "round-less" almost real time Delphi method, 73:321
Delphi, current validity of the method in social sciences, 73:467
and cross-impact, experts' knowledge, a comparison of two methods, 73:679
Design concepts, product classification to support approximate life-cycle assessment, 73:228
Diffusion of innovations, automatic forecasts for, 73:182
Digital economy, empirical findings of its infrastructure in the case of Korea, 73:377

Digital multimedia broadcasting, socio-technical challenges, survey of Korean mobile television development, 73:1144
Discussion of Coates' commentary, a visible end to innovation, 73:903
Drivers of innovation, environmental concerns in Portugal, 73:266
Dutch waste management system, industrial ecology and waste infrastructure development, 73:302

E-commerce critical success factors, East vs. West, 73:1161
Emerging technologies, forecasting with the aid of science and technology databases, 73:835
Emerging technologies, forecasting using bibliometrics and patent analysis, 73:981
End of life vehicles, new EU Directive, assessing the economics of auto recycling activities, 73:277
Environmental foresight, relationship between environmental concerns and innovation in Portuguese manufacturing firms, 73:266
Environmental performance improvement, analyzing the innovation process, 73:290
European technology policy, joint R&D projects, experiences in the context of, 73:860
Experts' knowledge, a comparison of two methods, Delphi and cross-impact analyses, 73:679
Exponential growth, turning point, from my perspective, 73:1188

From my perspective:
turning point: the end of exponential growth, 73:1188
Fuzzy time series, entropy-based and trapezoid fuzzification-based approaches for forecasting IT project cost, 73:524

Genetically modified organisms, legitimate governance of risk at EU level, 73:61
Georgia, introducing data mining techniques, measures for knowledge-based economic development, 73:950
Germany, corporate venture capital, analysis in 2000 and 2003, 73:813
Governance of innovation, and the risk, in Europe, 73:1
Governance of risk, EU level, the case of genetically modified organisms, 73:61
Grey model, application to vehicle fatality risk estimation, 73:588

Human tissue engineered technologies, framing the case for a new regulatory regime in Europe, 73:41

ICT market, diffusion, substitution and competition dynamism, the case of Japan, 73:731
ICT, relations between user-side innovation and standardisation, 73:27
Industrial ecology, a roadmap for the Dutch waste management system, 73:302
Industrial production systems, lessons from waste management in zinc production, 73:250
Industrial structure change, and technological diffusion, modelling creative destruction, 73:1084
Information technology, a functional approach to studying technological progress, 73:1061
Innovation for sustainability, trends and opportunities in the learning society, 73:215
Innovation simulation model, knowledge transfer, 73:138
Intellectual capital, an empirical study of ITRI, 73:886
Internet service, estimation of the demand for future portable service in Korea, 73:575
Inter-organizational network structures, overview of the available insights concerning radical changes, 73:390
IPv6, and the next generation television, 73:510
IT, entropy-based and trapezoid fuzzification-based approaches for forecasting project cost, 73:524
ITRI, intellectual capital, an empirical study of, 73:886

Japan, diffusion, substitution and competition dynamism inside the ICT market, 73:731
Jet fighter aircraft, predicting U.S. introductions from 1944 to 1982, dogfight between regression and TFDEA, 73:1178
Joint R&D projects, experiences in the context of European technology policy, 73:860

Knowledge-based economic development, data mining techniques to economic developers in the state of Georgia and the US South, 73:950
Knowledge indicators, measure of patent stock, 73:793
Knowledge integration, and network formation, 73:1121
Knowledge prospecting, technology mining for small firms, 73:937
Knowledge transfer, in an innovation simulation model, 73:138

Korea, estimation of the demand for future portable Internet service, 73:575
Korea, infrastructure of its digital economy and some empirical findings, 73:377
Korean mobile television development, socio-technical challenges in the development of digital multimedia broadcasting, 73:1144

Large-screen television, use of conjoint analysis with diffusion model to forecast future demand, 73:362
Learning society, trends and opportunities framing innovation for sustainability, 73:215
Life-cycle assessment, for design concepts and development of product classification, 73:228
Logistic analysis, recent environmental interest, 73:153

Main market adopters, empirical analysis of the time sales purchasing, 73:1107
Mea culpa? No, 73:912
Meta-analysis, social impact analysis relevant for tech mining, innovations in, 73:966
Military environmental health considerations, nanotechnology and the future, 73:128
Modelling creative destruction, technological diffusion and industrial structure change to 2050, 73:1084
Multi-factor efficiency perspective, relationships among world GDP, energy consumption and carbon dioxide emissions, 73:483

Nanotechnology, future military environmental health considerations, 73:128
Nanotechnology, text mining as a valuable tool in foresight exercises, 73:1013
National foresight activities, assessing rationale, process and impact, 73:761
Navigation technologies, five historical and contemporary cases, 73:845
Network formation, and knowledge integration, 73:1121

Patent analysis, and bibliometrics for forecasting emerging technologies, 73:981
Patent stock, as knowledge indicators, measurement of, 73:793
Portfolio modeling, exploring causal relationships in an innovation program, 73:1028
Portuguese innovation, interpretation of innovation data to foster environmental foresight, 73:266

Radical discovery and innovation, systematic acceleration in science and technology, 73:923
R&D, system for industrial development in Taiwan, 73:559
Regional development, building regional visionary capability and futures research, 73:778
Regression and TFDEA, dogfight, predicting U.S. jet fighter aircraft introductions from 1944 to 1982, 73:1178
Regulatory regime, governance of human tissue engineered technologies, 73:41
Risk, and the governance of innovation in Europe, An introduction 73:1
Risk, pre-assessment of Finnish forest biotechnology, 73:705
Roadmap for the Dutch waste management system, industrial ecology and waste infrastructure development, 73:302

Sales, empirical analysis of the time at which main market adopters purchase, 73:1107
Scenario analysis of energy requirements, in China's rapidly developing society in the year 2020, 73:405
Scenario, sustainable global automobile transport in the 21st century, an integrated analysis, 73:607
Science and technology databases, for forecasting emerging technologies, 73:835
Semiconductor wafer foundries, agile strategy adaptation, example from Taiwan, 73:436
Social capital, capabilities, and entrepreneurial strategies, study of Taiwanese high-tech new ventures, 73:168
Socio-technical challenges, development of digital multimedia broadcasting, survey of Korean mobile television development, 73:1144

Taiwan, agile strategy adaptation in semiconductor wafer foundries, 73:436
Taiwan, managing academic innovation, towards a 'scientific-economic' framework, 73:199
Taiwan, the R&D system for industrial development, 73:559
Taiwanese high-tech new ventures, a study of the effects of social capabilities, and entrepreneurial strategies, 73:168

Taiwan's science park, evaluating the development of high-tech industries, 73:452
Tech mining, Introduction, Special Issue, 73:915
innovations in meta-analysis and social impact analysis, 73:966
as a method to aid small firms, knowledge prospecting for competitive advantage, 73:937
Technology and Social Risk, Special Issue, 73/1
Technology assessment, proposal for new method that will focus on the ethical implications of new technologies, 73:543
Technology transfer and innovation, exploring the relationship with reference to Chinese industrial firms, 73:666
Technological Change and the Environment, Special Issue, 73/3
Technological diffusion, and industrial structure change, modelling creative destruction, 73:1084
Technological progress, a functional approach, application to information technology, 73:1061
Telecommunication data, seasonal decomposition and forecasting, a comparative case study, 73:495
Text mining, as a valuable tool in foresight exercises, study on nanotechnology, 73:1013
TFT-LCD market, a methodology for the analysis of the supply and demand, 73:422
The Singularity is Near: When Humans Transcend Biology, Book Review and Discussions, 73:95, 101, 104, 112, 121
Tillage, in Australian cropping regions, an application of duration analysis,73:630

University library services, and data-mining, 73:1045
User-side innovation, shaping through standardisation in ICT, 73:27

Vehicle fatality risk, application of the grey model for its estimation, 73:588
Venture capital, in Germany, a comparative analysis of 2000 and 2003, 73:813

Waste infrastructure development, industrial ecology as a roadmap for sustainability, 73:302
Waste management, development and implementation options in embedded industrial production systems, 73:250
When does the majority become a majority, empirical analysis, main market adopters, 73:1107
